

Sheet metal folder ZGR-3000/1.2

Folding machine ZGR-3140/1.2 mm/155*
Hand-operated folding machine in a stable design. The bending machine has a stop for equal bending angles of 0 - 155 degrees and rear stops for holding the sheet metal. These swivel bending machines are characterized by a high bending performance with a high weight. Excellent workmanship and practical detailed solutions convince with this bending machine, the bending performance is with 1.2 mm sheet steel.

Description

Bending length: 3140 mm

To steel sheet: 1.2 mm

Bending angle: 155 degrees

Bending beam: 30 mm

Weight of the press brake: 740 kg
